

Curriculum Vitae

1. PERSONAL INFORMATION

Full Name Kabtamu Getaw Temtim	Phone 09 42 49 03 42
Email kabtamugetaw589@gmail.com	Location Addis Ababa
Qiyas Student ID qiyas-2026-002135	Portfolio https://kabtamu1221.github.io/port_folio/
Primary Career Goal Employment	Availability Immediately

2. PROFESSIONAL SUMMARY

Results-driven professional with advanced technical training in Cybersecurity and Digital Risk Management from Qiyas-AAU-Project , specializing in Ethical Hacking, SOC Analysis, and Active Directory security. Proficient in Reverse Engineering and malware analysis, I leverage a dual-perspective technical skillset to proactively hunt threats, analyze logs, and execute targeted penetration testing. I am seeking a high-impact cybersecurity role within an enterprise team to defend critical digital assets, respond to incidents, and elevate organizational security posture.

3. EDUCATION

Qualification	Institution	Completed Year
BSc in Computer Science	Debre Markos University	2025

4. QIYAS TRAINING

- ❖ **Training Category / Program:** Cybersecurity and Digital Risk Management
- ❖ **Training Period:** May 26, 2026 – September 30, 2026
- ❖ **Key Competencies:** Network Security, SOC Monitoring, Incident Response, Penetration Testing, Vulnerability Assessment, Threat Hunting, Web Application Security, Linux/Windows Security, SIEM & Log Analysis, Wireshark, Nmap, Burp Suite, Wazuh, Kali Linux, Python & Bash Scripting.

5. WORK EXPERIENCE / INTERNSHIP

- ★ **Organization / Employer:** Super Double T General Trading PLC
- ★ **Role / Position:** System Administrator
- ★ **Period:** September 17, 2025 – December 27, 2025
- ★ **Responsibilities / Achievements:**
 - ❖ Configured and maintained network/server infrastructure for secure, reliable operations
 - ❖ Hardened systems and managed user access controls across Windows/Linux environments

6. TECHNICAL & PRACTICAL SKILLS

- Network security monitoring & SOC incident response
- Vulnerability assessment & penetration testing (Kali Linux, Nmap, Burp Suite)
- SIEM & log analysis, threat hunting (Wireshark)
- Linux/Windows system hardening
- Python & Bash scripting for security automation

7. PROJECTS / PRACTICAL ASSIGNMENTS

- ★ **Web-Based Health Information System** — Developed a PHP/MySQL web application using react native, HTML, CSS, and JavaScript to manage patient records and appointments and reduce manual errors. *(Final Year Project, Debre Markos University)*
- ★ **Security Monitoring & Incident Response Platform** — Developed a cybersecurity platform with a **Python backend** and **React dashboard** for security event collection, real-time threat detection, monitoring, and incident response, using Wazuh, Wireshark, and SIEM concepts. *(MY INSA Cybersecurity Final Project)*

8. CERTIFICATIONS / ADDITIONAL TRAINING

- **Cyber security and digital risk management — Qiyas-AAU(Addis Ababa University)-PROJECT**
- **Data Analysis Fundamentals** — 5 Million Ethiopian Coders (in collaboration with Udacity)
- **Android Developer Fundamentals** — 5 Million Ethiopian Coders (in collaboration with Udacity)
- **Programming Fundamentals** — 5 Million Ethiopian Coders (in collaboration with Udacity)

9. LANGUAGES

- ❖ English-Proficient
- ❖ Amharic -Native
